

AUTOMATION FOR SHEET METAL PROCESSING

MILLUTENSIL
INNOVATION

ABOUT US

MILLUTENSIL INNOVATION SRL

Our company offers a complete range of coil processing lines worldwide, with a mission to provide customized, innovative, and technological solutions for companies operating across a variety of markets.

Over the years, we have expanded our global presence and today we proudly operate in 35 countries across five continents.

We are committed to continuous research and development to produce high-quality machinery and enhance overall performance. Our goal is to become your leading technological partner by offering a comprehensive range of integrated solutions and services.

OUR PRODUCT LINES

- > AUTOMATION FOR SHEET METAL PROCESSING
- > LUBRICATION SYSTEMS
- > CONVEYOR BELTS FOR PARTS AND SCRAPS
- > DIE-SPLITTERS AND DIE AND MOLD SPOTTING PRESSES

OUR SERVICES

THE INDUSTRIES WE SERVE

AUTOMOTIVE:

We design highly innovative solutions in various applications, including e-mobility, working with high-strength materials and aluminum;

WHITE GOODS:

We collaborate with leading global manufacturers to design and produce dedicated lines for the household appliance industry;

ELECTRONICS:

We develop a wide range of systems used in high-speed blanking lines for the production of connectors and other electronic components.

CUSTOMER CARE

To provide our customers with the best possible service, a team of skilled technicians is dedicated to each project - from development and installation to after-sales support. We offer ongoing assistance starting from the decision-making process through to the post-purchase phase, including operator training and remote diagnostic support.

SUSTAINABILITY

We operate within the framework of eco-sustainability, thanks to advanced technology that ensures significant energy savings and contributes to reduced operating costs. We promote a culture of quality and safety to guarantee high-level products that are safe, long-lasting, and consistently reliable.

OUR SOLUTIONS

WE DEVELOP
CUSTOMIZED SOLUTIONS
BASED ON THE SPECIFIC
SECTOR AND TECHNICAL
REQUIREMENTS
OF EACH CUSTOMER.

OUR SOLUTIONS

WE HELP YOU EFFICIENTLY
FIND THE BEST SOLUTION,
USING CUTTING-EDGE TECHNOLOGIES.

Our green line offers a variety of technologically advanced solutions tailored to the specific industries and needs of our customers, including:

- EQUIPMENTS FOR MECHANICAL AND SERVO PRESSES
- FEEDING LINES FOR HIGH-STRENGTH MATERIALS
- FEEDING LINES FOR ALUMINUM
- FEEDING LINES FOR LAMINATION PROCESSES
- FINE BLANKING SOLUTIONS
- AUTOMATIC DISK CUTTING LINES
- MATERIAL-SAVING TECHNOLOGIES

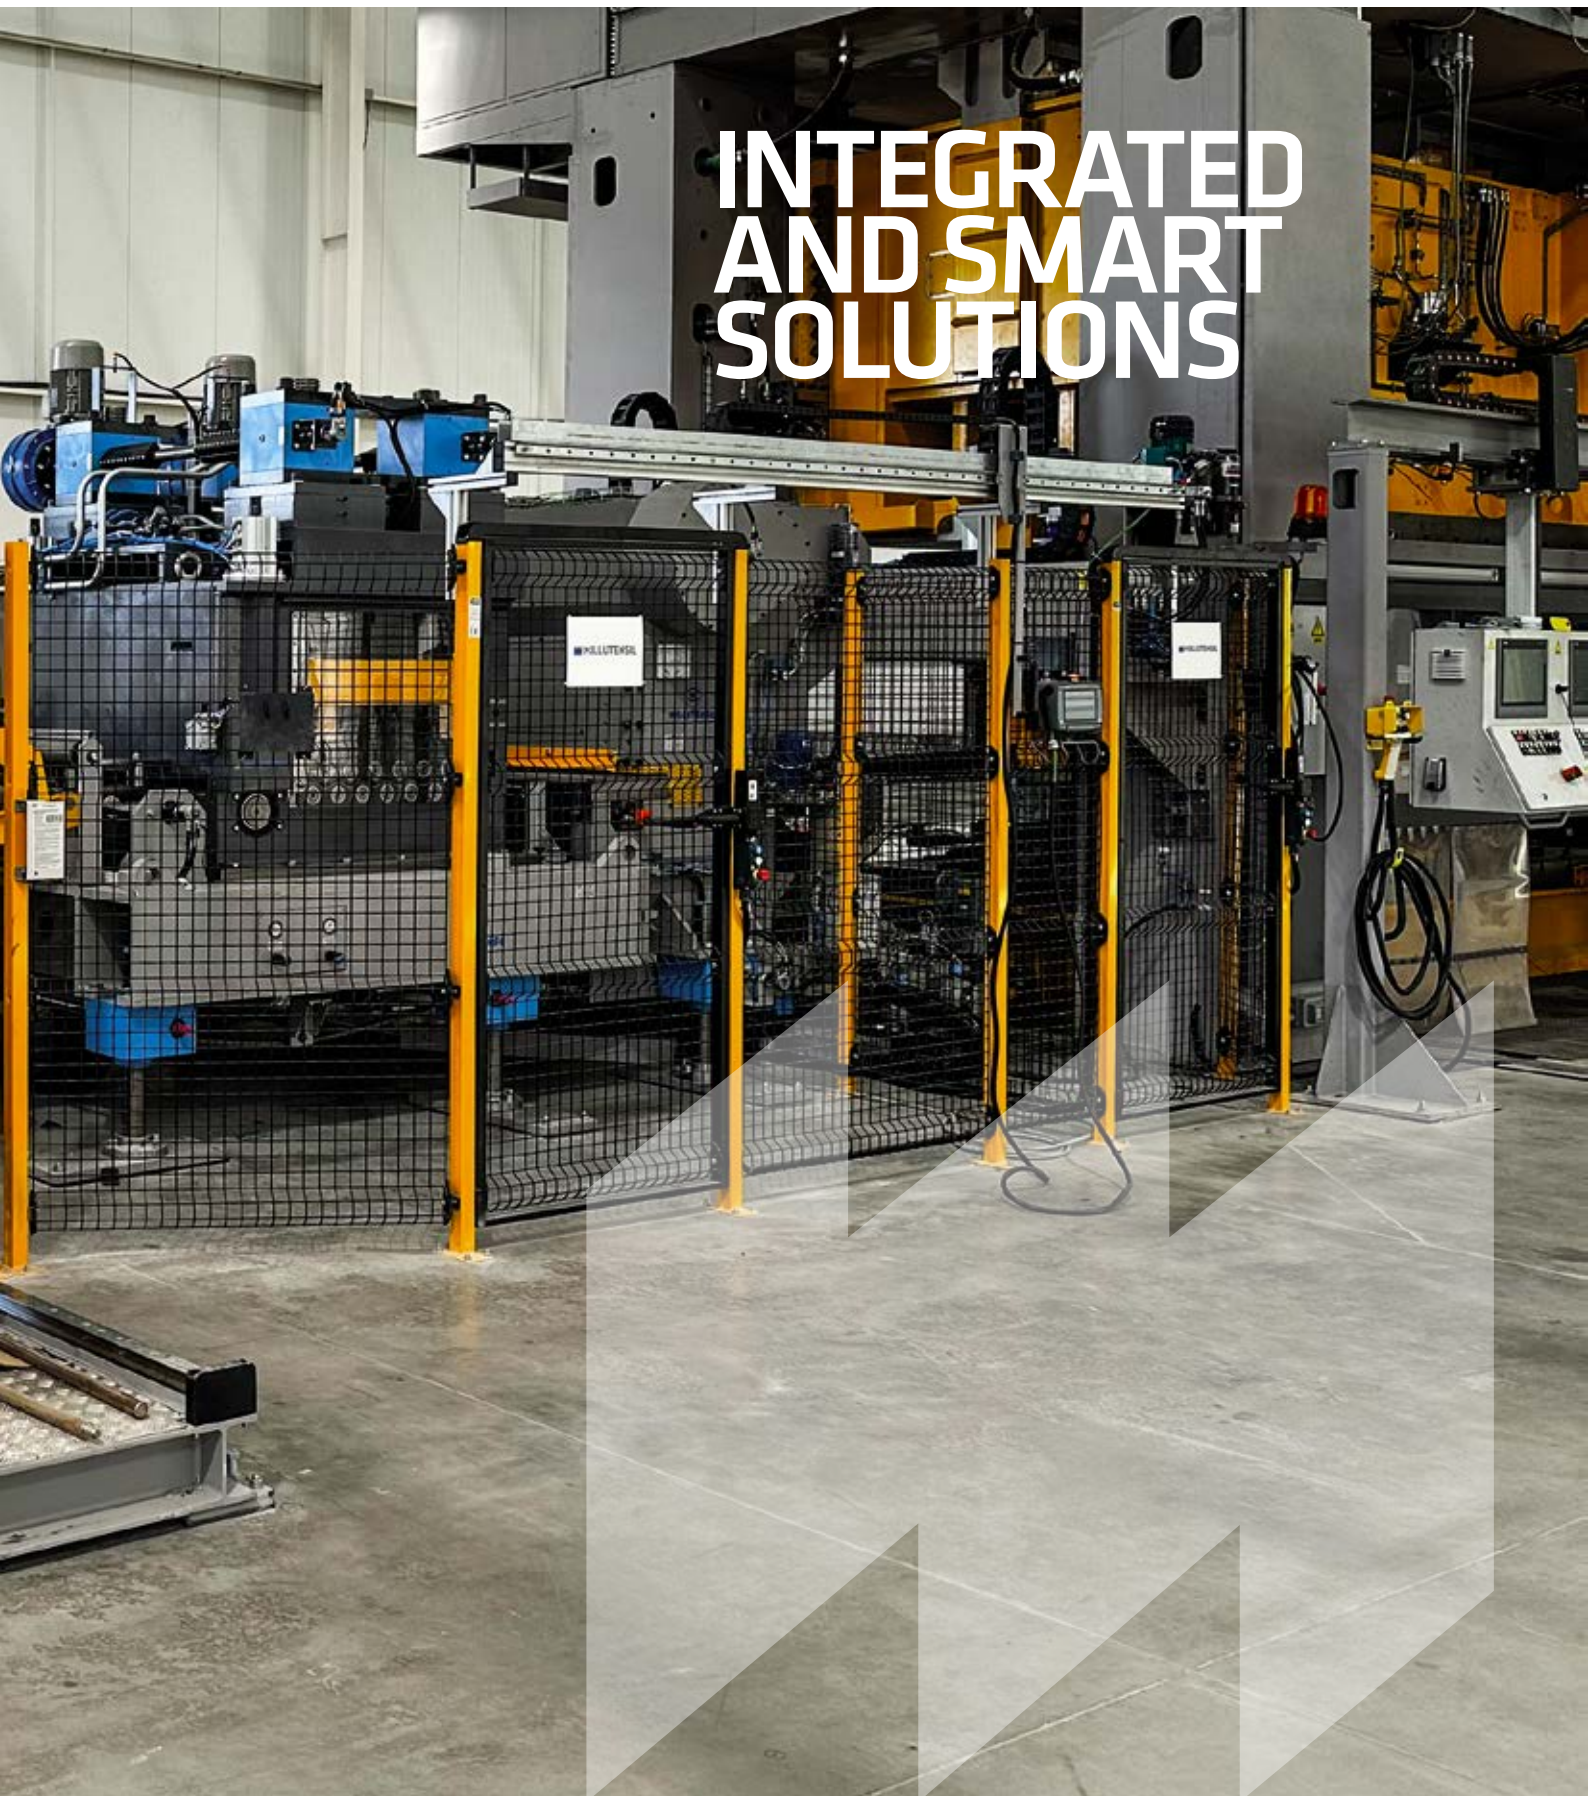

OUR SOLUTIONS

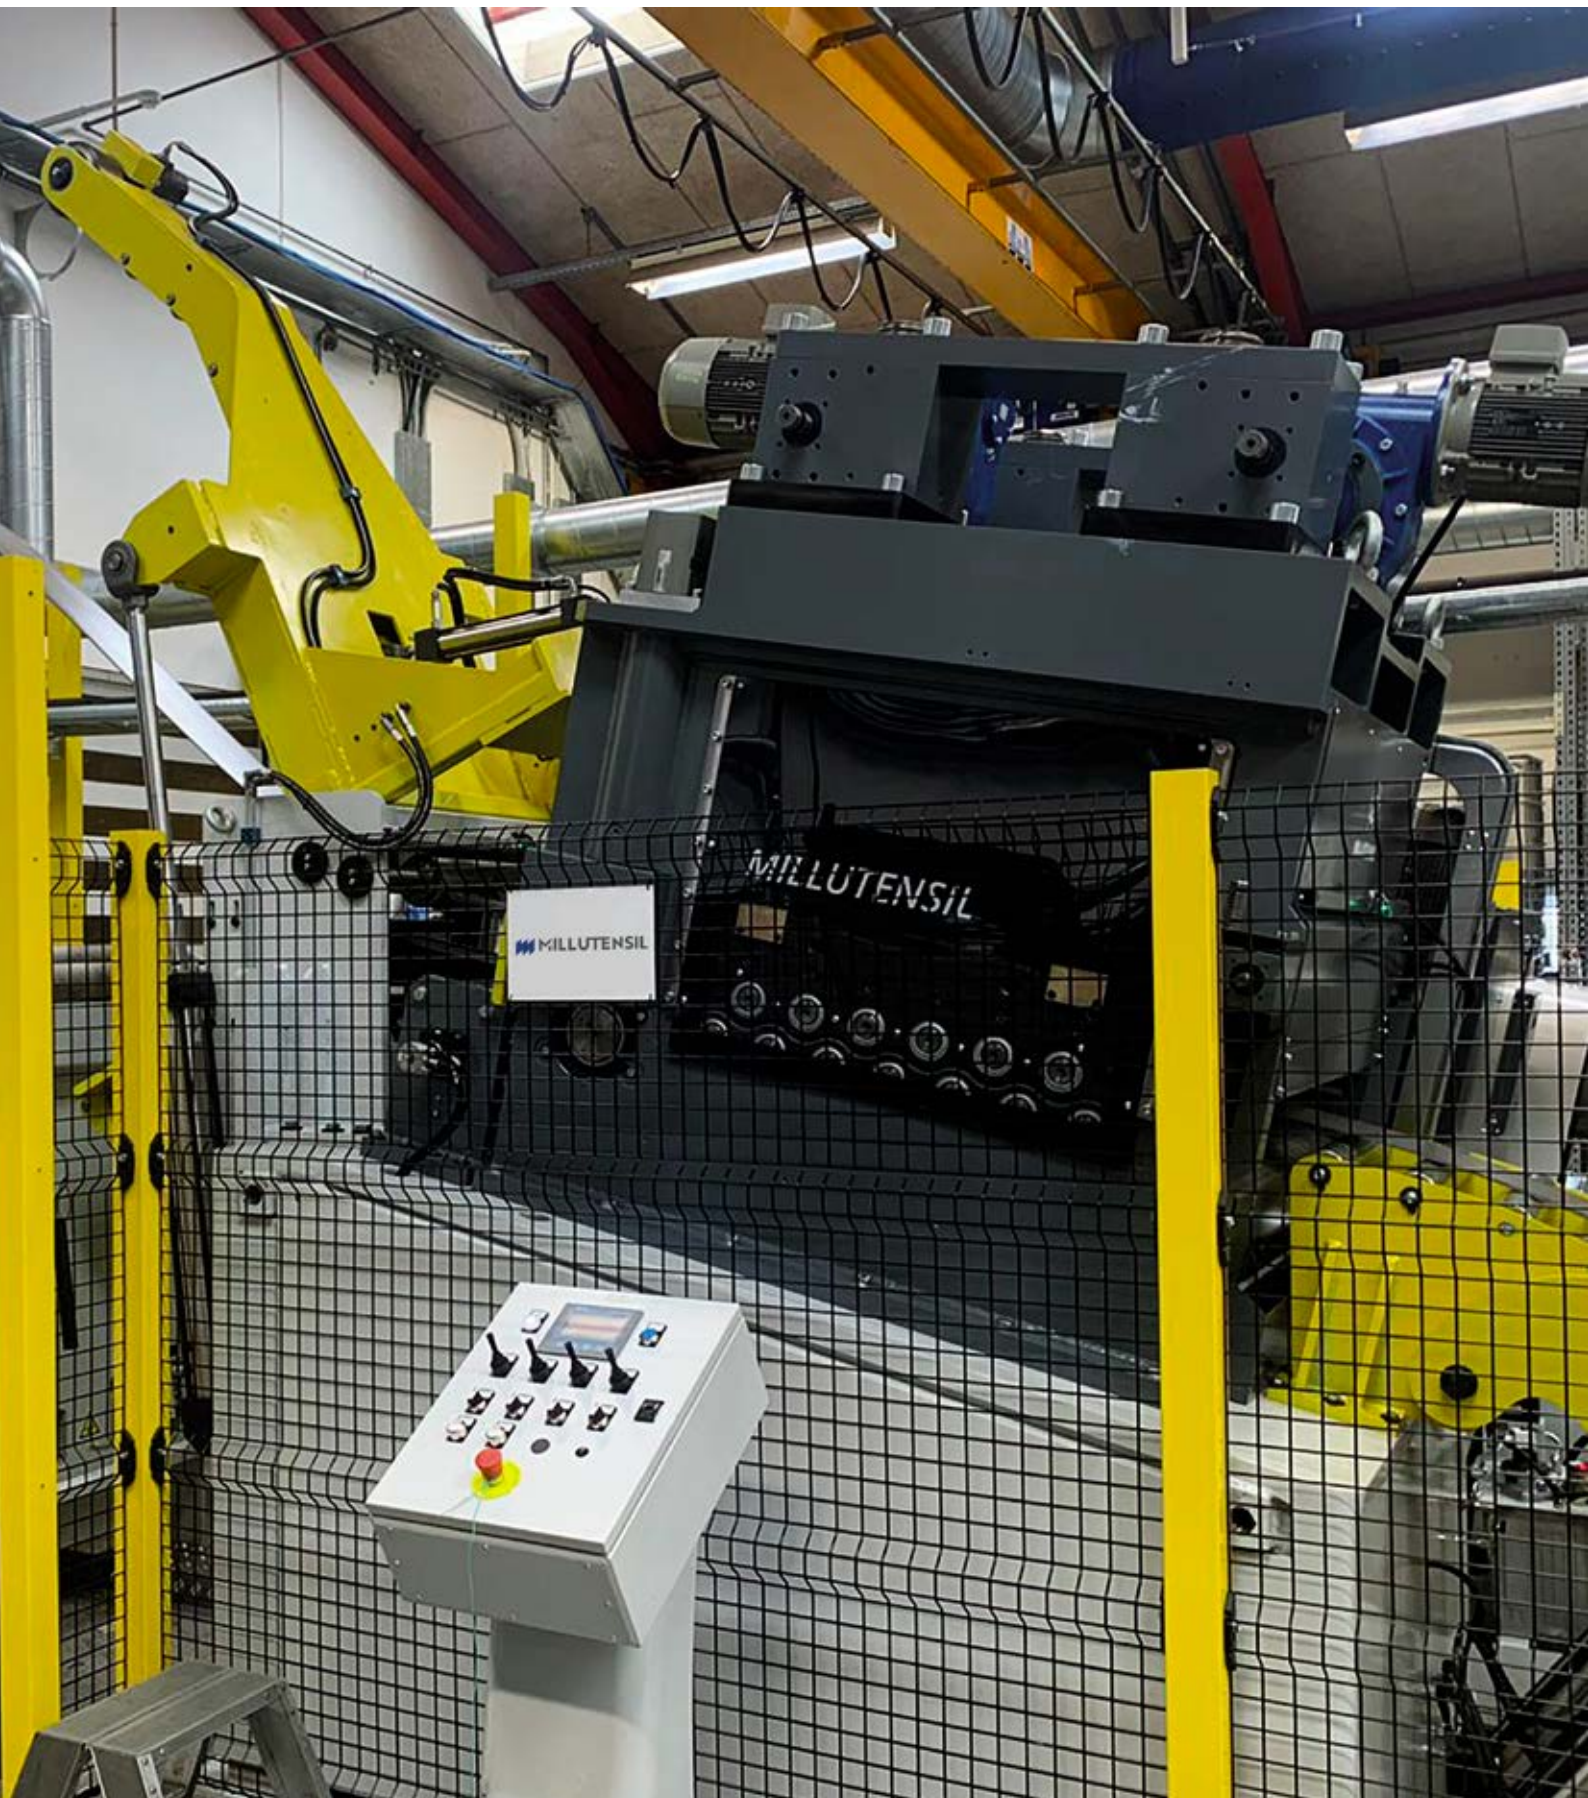

INTEGRATED AND SMART SOLUTIONS

INTEGRATED AND SMART SOLUTIONS

COMPREHENSIVE PRODUCTION ENVIRONMENT MANAGEMENT

We don't just supply components around the press - we manage the entire environment surrounding it. Thanks to our in-depth expertise and smart technologies, we develop fully integrated and intelligent systems that coordinate all key production elements, including coil feeding equipment, lubrication units, scrap and parts handling conveyors, and more.

With our Smart Link System, every element communicates in real time, enabling a seamless, optimized production process from setup to changeover. Customers benefit from having a single, trusted partner who designs, delivers, and integrates all auxiliary technologies - ensuring greater productivity, efficiency, and competitiveness.

This all-in-one approach significantly reduces costs, downtime, and errors during production changeovers, delivering real value from day one.

QUALITY, SAFETY, AND ERGONOMICS

All our solutions are designed to maximize operator comfort while meeting the highest safety standards. Thanks to the superior quality of our systems, we ensure long-term reliability, ergonomic handling, and safe operation - even under the most demanding production conditions.

INTEGRATED AND SMART SOLUTIONS

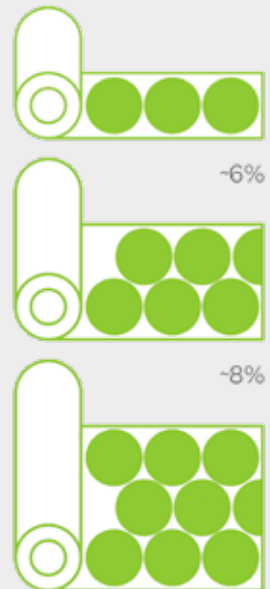

MATERIAL SAVING SOLUTIONS

ZIG-ZAG LINE FOR MATERIAL SAVING SOLUTIONS

We have developed the Zig-Zag program, a range of innovative and versatile solutions designed to optimize material usage and significantly reduce production costs.

ZIG-ZAG AND AUTOMATIC LINES FOR COIL DISC CUTTING

Our automatic Zig-Zag lines and coil disc cutting systems are integrated seamlessly with presses, multi-disc shears, and laser technology, offering a complete solution for efficient material processing.

HOW IT WORKS

This program automatically calculates the optimal arrangement of discs along the coil width, ensuring maximum material usage and minimal metal waste. Zig-Zag lines are the ideal solution for producing high-quality, low-cost discs.

By optimizing material consumption, it allows for greater flexibility during production, reducing material waste to a minimum.

BENEFITS

This program provides multiple advantages, including:

6-8% savings on sheet metal

Significant reduction in metal waste

Good payback period with lower initial investment costs

Quick and easy line parameter programming

Efficient optimization of material usage
